### **REASONS FOR ALLOWANCE**

The following is an examiner's statement of reasons for allowance: the claimed invention comprising either a store tank with an air outlet provided in the upper wall, a mixing chamber with plural small holes formed in an annular wall near the lower end of the chamber and a vaporized fuel oil outlet tube connected with an upper end of the chamber, an intake tube with a bubble producer at its lower end having plural bubble stones therein, and a nozzle connected with the air outlet tube and vaporized fuel oil outlet tube sending both vaporized fuel oil and pressurized air synchronously or a nozzle body with a cone shaped outlet and an air connect tube, a pressure adding tube positioned lengthwise in the nozzle body chamber, a pressure adding cylinder, and a cap with a cone shaped outlet formed at its front end spraying out vaporized fuel oil in a radial direction after passing through the cap enroute to supply a burning appliance and installation is not found in the prior art either singly or in combination. The closest prior art references are Fujiwara et al. (US 5,470,225) which discloses a funnel shaped fuel atomizing nozzle with an air passage supply tube and combustion cylinder and Culbertson (US 4,125,360) which discloses an open ended cylindrical mixing chamber fuel nozzle with aperture admitted air, respectively. Other prior art references cited in this action contain one or more of the claimed elements but do not provide the motivation or suggestion combination for obviating the claimed invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
